Profile

As a Software Developer turned UX designer with a keen interest in emerging technologies, I strive to leverage scientific insights for user-centric solutions. My approach to design is rooted in the principle of synergy where all aspects of design comes together as a cohesive one. The flow of intents, ideas and energy is aligned and resulting design belongs in it's living environment.

Education

2022 – Present   **MIT Institute of Design, Pune**

M.Des. User Experience Design, GPA: 8.4/10.0

2014 – 2018   **CTAE, Udaipur**

B.Tech. - Electronics and Communication Engineering

Employment

2018 – 2020   **Nuchange Informatics**

Associate Software Engineer

In my role as a Backend Software Developer, I had the opportunity to be a part of the team developing a Hospital Management System (HMS). My responsibilities touched various components of the system, including the HR Management Dashboard, the Data Analytics Dashboard and Data Migrations.

2017 – 2017   **Airport Authority of India**

Industrial Trainee

Over a two-month training period at the Airport Authority of India, I gained hands-on experience with electronic equipment and systems essential to airport operations.
